Hard Skill

- Frontend: React, React Native, TypeScript
- Backend: C#, Python (intermediate)
- Databases: SQL, MongoDB, JSON data handling
- Languages: English – B2 level

Soft Skill

- Strong team collaboration
- Ability to motivate others
- Positive and friendly attitude
- Commitment to planning and organization

Education Background

- Bursa Uludağ University, Bursa, Turkey
Bachelor of Science in Computer Engineering
Expected Graduation: July 2026
GPA: 3.17 / 4.00
- Adem Tolunay High School
High School Diploma
Completed in 2022

About Me

I am a Computer Engineering student at Bursa Uludağ University. I was born in Muratpaşa, Antalya, and I also finished high school there. I am interested in software development and learning new technologies. I want to improve myself by working on real projects and gaining experience through internships. I enjoy learning, working with others, and solving problems.

Professional Experience

Sena Tur, Antalya, Turkey | Night Tourism Staff

July 2023 – September 2023

Key responsibilities:

- Coordinated communication between night-shift drivers and the company.
- Monitored vehicles and ensured night-time transportation operations ran smoothly.
- Assisted in organizing and managing schedules and operational needs during night shifts.

Projects

Car Services Mobile Application

- *React Native, SQL Server*
- Developed a mobile application for a fictional car company that allows users to access vehicle details, customer support, service locations, and campaign information. The app includes user authentication (sign-up and login) and stores data using a custom SQL Server database.
- Built entirely by myself from scratch.

UNO Game (Single-Device Web Version)

- *React, SQL Server*
- Created a web-based UNO card game that supports all traditional game mechanics. Additional features include multiple themes, background music, and user login/registration.
- Designed and developed the full project individually.

Recipe App

- *React Native, MongoDB*
- Built a fully functional recipe application that includes all core features users expect: browsing recipes, viewing detailed ingredients and instructions, user accounts, and search functionality. Data is stored and managed using MongoDB.
- Developed independently from start to finish.

Additionally, I have completed numerous small-scale personal projects to improve my skills in front-end and back-end development.
